VS330 XGA 3LCD Projector

3x Brighter Colors with Epson® Projectors[1]

Affordable XGA performance in a portable business projector.

3x Brighter Colors[1], and reliable performance — 3LCD, 3-chip technology

One measurement of brightness is not enough — look for both high color brightness and high white brightness. The VS330 has:

Color Brightness: 2700 lumens[2]
White Brightness: 2700 lumens[2]

HDMI digital connectivity — HD quality video and audio with just one cable

Simple Setup Suite — a host of innovative features that ensure flexible placement, easy connectivity and convenient control in virtually any setting

Amazing image quality — native XGA (1024 x 768) resolution

Affordable XGA performance in a portable business projector.

The VS330 projector offers essential business features at a budget-friendly price. With a lightweight, travel-friendly design and easy setup, this XGA performer gets you up and running fast, whether you're presenting in the board room or across town. Offering 3x Brighter Colors[1] than competitive models, Epson® 3LCD projectors ensure bright, compelling presentations. The VS330 delivers exceptional image quality, plus 2700 lumens of color brightness and 2700 lumens of white brightness[2]. And, it includes Epson's Simple Setup Suite with HDMI connectivity, easy-slide keystone correction, and more, for a new level of convenience. No matter where business takes you, you'll be ready with this versatile projector.

3x Brighter Colors with Epson[1]

Brilliant image quality requires high color brightness (color light output), and Epson 3LCD projectors have 3x Brighter Colors than leading competitive projectors[1].

One brightness measurement (lumens) is not enough. A projector's specification needs to show both high color brightness and high white brightness. If color brightness is lower than white brightness, images may be dark, dull and lose detail. If not provided, be sure to ask for a projector's color brightness specification.

- **Filters to protect your investment** — with easy side access for hassle-free maintenance

The more pixels, the better the detail

Resolution defines the level of detail and depth you'll see in a projected image. It's measured as the number of pixels wide by the number of pixels high.

1.5x more resolution than SVGA

2x more resolution than SVGA

SVGA (800 x 600)
Meets basic projection needs

XGA (1024 x 768)
Ensures sharper detail

WXGA (1280 x 800)
Offers high definition and is ideal for widescreen (16:10) displays

1 Compared to leading 1-chip DLP business and education projectors based on NPD data, July 2011 through June 2012. Color brightness (color light output) measured in accordance with IDMS 15.4. Color brightness will vary depending on usage conditions.

2 Color brightness (color light output) and white brightness (white light output) will vary depending on usage conditions. Color light output measured in accordance with IDMS 15.4; white light output measured in accordance with ISO 21118.

3 Data source: ProjectorCentral.com Jan. 2013. Average of 1128 shipping models for which the manufacturers provided lumens and total power data, all resolutions and brightness levels. Energy efficiency was measured as wattage per lumen. It was measured for both 3LCD and 1-chip projectors in each of five brightness segments. 3LCD projectors averaged less required electricity per lumen in each of the five segments.

4 Leading 3LCD and 1-chip DLP business and education projectors selected according to NPD data as of July 2013. Independent U.S. research conducted by Radius Research (July 2013); results confirmed at a 99% confidence level.

5 ECO Mode is up to 6000 hours. Normal Mode is up to 5000 hours. Lamp life will vary depending upon mode selected, environmental conditions and usage. Lamp brightness decreases over time.
