Robust Performance

PowerLite D6000 series projectors

Dust-resistant design meets cutting-edge technology.

Engineered with a robust, dust-resistant design, featuring advanced technology and networking capabilities, the Epson D6000 series is the perfect solution for higher education lecture halls and corporate conference rooms alike. With its unprecedented exhaust vent shutter, cable locks and long filter/lamp life, the D6000 series gives you added peace of mind. Cutting-edge technology such as the split-screen function, HDMI input and advanced networking features make your investment a future-proof one.

The best-selling projectors in the world.

Epson understands business and education and has a solution no matter what your situation. Built with image quality and reliability in mind, Epson projectors enhance communication and inspire collaboration, while offering a low total cost of ownership. From long-throw projectors to ultra-short-throw and all-in-one solutions, Epson has the model made for you.

Brilliant image quality

3LCD technology — for quality and color that's beyond amazing

- 3 chips for full-time, vibrant color
- 25% less electricity required per lumen of brightness when compared to 1-chip DLP projectors¹
- Over 20 years of road-tested reliability built into every projector

Amazing color and white light output

The PowerLite D6150/6155W delivers 3500 lumens of color light output and 3500 lumens of white light output²; the PowerLite D6250 delivers 4000 lumens of color light output and 4000 lumens of white light output² for true-to-life, vibrant, colorful images. For today's color-rich, multimedia content, users want a projector that delivers both optimum white and color imagery. That's why the industry has developed a new metric called Color Light Output.

3500

3500

4000

4000 5

LIGHT

Award-winning Faroudja DCDi[®] Cinema for advanced video quality

Faroudja DCDi Cinema is a video enhancement technology, used primarily for film viewing, that produces exceptional image quality without

introducing artifacts. Faroudja developed DCDi (Directional Correlational Deinterlacing) to eliminate jaggy images by using a unique algorithm. This

algorithm, in combination with the technology's decoding, deinterlacing and enhancement features, won an Emmy Award from the National Academy of Television Arts and Sciences in 2001.

Color light output

- dull and flat

When color and white light output are equal or balanced, colors are authentic and vibrant.

- Always look for Color Light Output when choosing a projector.
- For optimum image quality and performance, the projector you choose should offer equal levels of color and white light output
- When the two measurements are not identical, images do not look balanced. Whites may be brighter, making the colored areas look

• The combination of color richness (Color Light Output) and brightness (White Light Output) is as critical as the combination of bass and treble would be when purchasing audio equipment

When white light output is greater than color light output, images may appear duller.

How is CLO measured?

The Color Light Output spec measures Red, Green and Blue, each on a 9-point grid, applying the same method used in the ISO 21118 standard for measuring White Light Output.

x	x	x
x	x	x
x	x	x

Brightness (or White Light Output) measures the total amount of white light projected in lumens on a 9-point grid. It does not measure color.

1	X	X	X		
	RED	BLUE	GREEN		
	X	X	X		
	GREEN	RED	BLUE		
1	X	X	X		
	BLUE	GREEN	RED		

Color Light Output

uses 3 sets of a 9-point grid to measure the primary colors - red, green and blue, using the same approach used to measure White Light Output, in lumens.

Robust design

Dust-resistant design

The PowerLite D6000 series features an innovative design with a glass cover in front of the lens and enhanced dust-resistance around the lens levers, offering added protection against dust and reduced maintenance costs. It also features exhaust vent shutters for protection against dust or bugs when not in use. In addition, a cable cover is included to protect the cables and prevent anyone from tampering with them.

1 World's first vent shutter

Projectors typically don't have exhaust vent shutters, so dust and bugs can enter into the projector, reducing the life of the equipment. With the D6000 series vent shutter, your projector is protected.

The D6000 series protects connectors from dust and other harmful elements with its convenient cable cover. And, it provides a sleek, finished look by hiding unsightly cables.

3 Two cable locks

For added security, the D6000 series includes two cable locks that allow you to secure the power and HDMI cables to the projector, thereby preventing others from tampering with the equipment.

4 Long-life E-TORL[®] lamp

The innovative E-TORL lamp lasts up to 6000 hours.³ The special E-TORL design minimizes both light diffraction and light leakage, providing you the ultimate in lamp longevity.

▲ Dimension without cable cover

5 10000-hour high-efficiency filter

This high-efficiency filter was designed to protect the optical engine, lamp and electronics from small dust particles that can enter any projector. It has a recommended 10000-hour filter cleaning schedule⁴ and can capture 99.5%⁵ of dust particles, thanks to its electrostatically charged, pleated, expanded design.

6 Covered lens

The glass cover in front of the lens protects it from being broken and from dust and other elements.

7 Lens lever cover with seal

Offering added protection from harmful elements, the D6000 series offers a unique design, with no gaps around the focus and zoom levers.

Cutting-edge technology

Split-screen feature*

Project two images (video or still) side-by-side from two different sources simultaneously. Choose from three layout options including a 50/50% splitscreen, a layout with the main image on the left and a layout with the main image on the right. You can swap the images, chose the source for the audio and even display closed captioning if the source signal includes it.

HDMI input for high-definition video and audio

- Compatible with the latest laptops, Blu-ray[®] and media players • Future-proof for digital content

Lavout Option 1: 50/50% split-screen

7000 6000 3000 1999 2000 2001 2002 2003

*One of the inputs needs to be either HDMI or DVI-D.

Layout Option 2: Main image on the left

Layout Option 3: Main image on the right

PC-free slideshow

- to display your images
- Create a slideshow using files on the USB drive

• HDMI digital connectivity — delivers both audio and brilliant HD video content with just one cable

- Just plug your USB drive into the USB port, and you are ready
- Compatible with the following file formats: JPG/BMP/GIF/PNG

Optional wireless connectivity with 802.11n

- Quickly connect to a wireless infrastructure (network) via a wireless LAN module
- Make wireless presentations with an ad hoc (peer-to-peer) wireless connection using the Quick Connect Wireless USB key

Document camera option

Partner your projector directly with an Epson DC-06 document camera. You can simply connect it through your projector's USB port (Type A) and start making more effective presentations and lessons without needing a computer.

Low cost of ownership

Long-life electrostatic air filter

This innovative filter was designed to protect the optical engine, lamp and electronics from small dust particles that can enter any projector. It has a recommended 10000-hour filter cleaning schedule⁴ and can capture particles as small as three microns,

The electrostatic filter is highly efficient at minimizing dust and also very durable. It captures dust particles down to the three-micron level.

O

Built-in 5 W speaker

• For multimedia applications — to engage your audience

Built-in closed captioning

- Accommodates those with hearing impairments
- Delivers important content when audio broadcasting is not preferred
- Helps save money no need to pay for an additional decoder and its installation
- Effective and easy to use easily enabled or disabled through the projector remote or menu

Advanced control, monitoring and communication

Epson's EasyMP[®] Monitor tool

If you are searching for a solution that gives you control over your time, Epson network projectors with EasyMP Monitor capabilities can help. Epson network projectors contain built-in remote access, with no licensing fees added, to Epson monitor software. These features also give you added control, and the ability to troubleshoot and monitor all Epson network projectors from any computer over a wired or wireless Ethernet network.

Additional features to assist administrators/help desk

- Remote access and control through the network
- Remote monitoring of up to 1024 Epson networked projectors
- View status, including input sources, power on/off, lamp life hours and more
- Preventative maintenance features including temperature levels and error alerts
- Schedule filter and lamp timer settings
- E-mail notification (SMTP) to send alerts to your handheld device
- Enterprise SNMP plug-in available

Network projection — content over IP

You can use EasyMP Network Projection to project your computer screen through the projector, via a network, for effective meetings, presentations and digital signage applications. You can use either wired or high-security wireless LAN connections and project the same or up to four different images on up to four projectors, or display a panoramic image.

Full networkability

Epson network projectors can also be accessed from your browser via an internal web page. Whether you assign a static IP address or enable DHCP, the projector becomes accessible once it's integrated in your network. The internal web page lets you control items such as network configuration, projector settings and e-mail alerts.

Message broadcasting

This innovative feature enables you to broadcast customized images/ alerts over the network for announcements or instructions. Messages can be sent to up to 1024 projectors simultaneously and will overwrite the current screen content if the projector is being used, unless this function is disabled by the presenter. If the projector is off, message broadcasting will turn the projector on and then display the message.

Easy and flexible installation

Quick Corner®

Fits the image to your screen perfectly. You can move any of the four corners of an image independently at setup, using the remote control to adjust each corner for a perfectly rectangular picture.

1.6x optical zoom

- Enlarge images 40% more than competitive models that have a 1.2x optical zoom
- Maximizes space by enabling closer positioning of the projector to the screen

Innovative horizontal keystone correction

- New, innovative the projector
- Horizontal (+/- 30 degrees) keystone correction for the ultimate in positioning flexibility
- Project images from a u-shaped tabletop, without having to move the table or put a stand in the center
- When the projector is placed off center, the presenter can stand in front of the screen without blocking the image

• New, innovative horizontal keystone allows for unique positioning of

Without horizontal keystone

Epson installation tools

Epson knows that choosing, installing and using a projection device correctly is very important. We have collected helpful tips and resources to make the process easier.

Throw Distance Calculator

Use the throw distance calculator to determine which projector is right for your room size.

You can interactively change the following attributes and find the right projector solution for your application:

- Projector model
- Lens type (if applicable)
- Lens shift (if applicable)
- Projection distance
- Screen size
- Screen positioning on the wall
- Aspect ratio

Visit epson.com for additional information on documentation and installation tools.

Online Installation Handbook

Find a step-by-step guide to help with the most challenging installation situations.

- Throw distance calculations
- CAD drawings
- Mounting information
- Connectivity information
- RS-232 control codes
- Remote control information
- Environmental requirements
- Maintenance information
- Optional accessories
