Acer ColorBoost II + Technology
ColorBoost III + Technology
ColorBoost III + is a advanced which refines the
waveform to improve optical color performance
based on lamp spectrum and color wheel
properties. ColorBoost II+ brings (1) Natural
color temperature: Improving natural color
temperature from a refined waveform to
achieve optical color balance. (2) Content-based
color brightness improvement: Combining Acer
eView Management which offers varied
scenario modes with color-specific refined
waveform to improve color brightness
according to content.

Acer projectors featuring ColorSafe are virtually immune to color decay, such as the yellow or green tint on images displayed by some projectors that have been used for extended periods of time. Acer projectors take advantage of DLP® technology to guarantee picture integrity despite prolonged use. The extended lifespan and consistent image quality lower the total cost of ownership and translate to big savings.

Acer EcoProjection Technology
Acer EcoProjection is a complete environment-friendly power management solution that reduces standby power consumption by up to 50%, from 5 W to 1 W. Also featured in the Acer EcoProjection suite is Acer ePower Management for customized power-saving configurations.
