Extremely strong to withstand normal daily abuse, yet flexible enough to conform with the unexpected. Be prepared.

prepare for the elements.

Outfitted for flexibility.

The LT170 will never let you lose focus. This 1500 ANSI lumens, up to 12.2” x 12.2” WXGA compatible projector delivers beautiful images from any presentation environment.

But there is even more control for you to consider. Because projector transportation or will pause your presentation when closed. As the shutter section of the image and highlight your point by using the 64-step image magnification with location control. Hone in on any touch source changes.

Flip up the manual lens cover to activate the picture mute feature! This way you can pause for questions without losing your focus on the presentation.

And, because projector security slot allows projector to be locked down with camera tripod. Or pack all of your presentation supplies into the optional LTBPK lightweight backpack. Grip it to go.

Flexible, strong.

The rugged exterior is designed to take on the most challenging elements head on. Your equipment needs to be resilient and durable for absolute success.

The LT170's best feature of all...portability. At less than 4 lbs., you can easily understand why this is a benefit. A special rubberized paint gives it a tripod adapter for truly convenient projector placement. Feel free to move around the room using the wireless remote. And for input. Its compact design also allows you to easily lock it inside a drawer or on a cart.

Get grounded up and ready to meet the elements head on. Your equipment needs to be resilient and durable for absolute success.

outfitted for flexibility.

It's only natural that you want to outfit yourself with equipment that can adapt to the unexpected. The built-in strength of the LT170's image enhancement technologies and the projector's ease-of-use will prepare you for any excursion. Perfect for sales presentations, training sessions, on-the-road travel, or down the hall, this projector is a must for your presentation needs. With top performance at a 1000:1 contrast ratio and color enhancements such as Advanced AccuBlend™ and VORTEX™ Technologies you will have the power to overcome the elements.

Advanced AccuBlend pixel-blending technology ensures detailed images when connected to non-native resolution computers are connected. VORTEX Technology configures amazing color uniformity, depth and clarity for video and data displays. To prove its flexibility, the LT170 has NEC's AutoSense Technology™, which detects the input signal and automatically sets-up, and adjusts its virtually all-computer and video sources. Plus, it's HDTV compatible. No adjustments are required.

The LT170 is totally in tune with the environment. Eco-Mode and the unique lamp mode setting will prolong the life of the lamp and reduce power consumption.

focus on control.

The LT170 will never let you lose focus. This 1500 ANSI lumens, up to 1024 x 768 pixels DLP projector delivers beautiful images from any computer or video source. Fine tune to get into the details of the presentation using the manual zoom/focus control. There is an on-screen section of the image and highlight your point by using the 64-step image magnification control. The built-in lens shutter protects the lens when transporting or will pause your presentation when closed. As the shutter closes it deactivates the picture mute feature. This way you can pause for questions without losing your focus on the presentation.

But there is even more control for you to consider. Because projector placement for portable presentations can’t be predicted, we’ve packed keystone correction into the LT170. This technology automatically squares the image to the screen when vertical distortion occurs. Sealed optics prevent dust and smoke from entering optical components which in turn reduces the need for cleaning.

grip it to go.
